🌍 ABOUT WORLD SOIL DAY 2026

World Soil Day (WSD), celebrated annually on 5 December, raises awareness of the importance of healthy soils and promotes sustainable soil management. The 2026 theme, "Tackle soil compaction, boost food production," highlights the need to protect soil structure so that roots can grow, water can move and soil organisms can thrive—supporting productive farms and resilient food systems.

Healthy soils support:
🌱 Strong root development and productive crops
💧 Water infiltration and moisture retention
🪱 Soil biodiversity and nutrient cycling
🌿 Sustainable agriculture and food production
🌍 Healthy ecosystems and resilient communities.

Soil compaction occurs when soil particles are pressed together, reducing the spaces through which air and water move. Heavy machinery, repeated traffic and livestock trampling can contribute to this problem, particularly when soils are wet and vulnerable. Compacted soils restrict root growth, disrupt water movement and affect the organisms that help maintain soil health. Over time, these changes can reduce crop productivity and weaken the land's ability to sustain food production.

This year's theme calls for greater attention to how we manage and care for our land. Protecting soil structure, managing farm traffic, maintaining organic matter and supporting biodiversity are important parts of sustainable soil management. By understanding the connections between soil condition, farming practices and crop growth, we can make better decisions to safeguard the resources on which our food systems depend.

Since December 2020, Impact Circle has championed soil biodiversity through awareness, education and community engagement. This year marks our seventh consecutive year hosting World Soil Day celebrations in Malaysia, continuing our efforts to connect communities with the importance of soil stewardship and responsible food production.

To bring this understanding into practice, our 2026 celebration will take place on Saturday, 5 December at HL Dragon Fruit Eco Farm in Sepang, Selangor. A guided farm discovery tour will introduce participants to dragon fruit cultivation, soil care and the connection between farming and food products. The programme also features knowledge-sharing sessions by Kapitani on myGAP (Malaysian Good Agricultural Practices), covering responsible farm management, good agricultural practices, and Tan Lan on soil health. Participants will have opportunities to exchange ideas, discover farm products and enjoy lunch at HL Restaurant & Café before concluding with shared reflections and appreciation.

Whether you are a farmer, student, educator, parent, entrepreneur or simply curious about where your food begins, World Soil Day invites you to reconnect with the living foundation beneath our feet—and discover how caring for our soils contributes to a healthier, more sustainable food future for Malaysia.

🌿 FARM IMMERSION PROGRAMME

HL Dragon Fruit Eco Farm, Sepang, Selangor
Experience a farm immersion at HL Dragon Fruit Eco Farm, exploring the connections between soil health, responsible farming and food production.

HL DRAGON FRUIT ECO FARM

PROGRAMME

7:45 AM
Gather at the designated pickup points for attendance and boarding.

8:00 AM
Depart for HL Dragon Fruit Eco Farm.

9:00–9:30 AM
Arrival and welcome by Impact Circle and HL Dragon Fruit Eco Farm.

9:30–10:30 AM
Dragon Fruit Farm Discovery — guided visit exploring cultivation, soil care and the connection between farming and food products.

10:30–11:30 AM
Knowledge-sharing session — sharing by Kapitani on good agricultural practices and Tan Lan on soil health.

11:30 AM–12:00 PM
Farm-product purchases and leisure time.

12:00–1:00 PM
Lunch at HL Restaurant & Café

1:00–1:30 PM
World Soil Day reflections, appreciation and group photograph.

1:30 PM
Depart HL Dragon Fruit Eco Farm for Kuala Lumpur.

The Organisers reserve the right to alter the content and timing of the programme in the best interest of the event.
